

CERTAIN is an exceptional type of alcoxylated alcohol **which lowers dynamic surface tension of the sprayliquid**. The extremely fast way in which CERTAIN lowers surface tension makes sure that bouncing of droplets, even on the most hydrophobic of leaf surfaces and regardless of droplet size, is completely suppressed.

These super-wetting characteristics of CERTAIN result in maximum amount of pesticide on the crop

BENEFITS OF CERTAIN®

- Benefits of CERTAIN
- Safe for all tested crops
- Environmentally friendly
- Maximum amount of pesticide on the crop
- Negates negative effect of large, anti-drift, droplets suitable for tank-mix applications of water-miscible formulations of pesticides such as WP, EC, WG, SC and SL formulations.

INDISPENSABLE FOR A GOOD CONTROL OF DISEASES IN HEAD CABBAGE

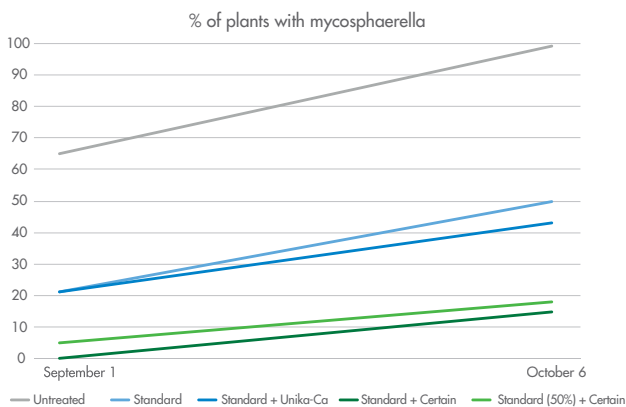

FUNGICIDES HEAD CABBAGE 2015-2016 EXPERIMENTAL DESIGN

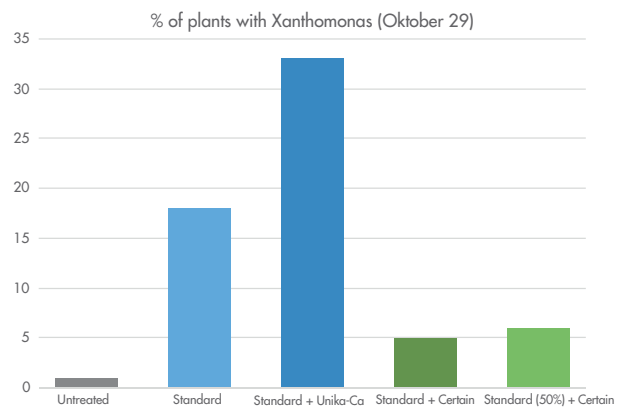

- 400 liter/ha
- Nozzletype XR 110-04 (Airmix)
- Pressure: 2.2 bar
- Harvest October 29 -> storage
