

TRANSPORTER

MODIFY
ECO CROP PROTECTION

OPTIMISED CROP PROTECTION DISTRIBUTION

TRANSPORTER is a carrier fluid designed to increase the effectiveness of fog and LVM treatments in greenhouses and refrigeration units. TRANSPORTER ensures the fog and LVM equipment produce small, uniform droplets which results in a better distribution of pesticides in large spaces. TRANSPORTER also minimizes loss of pesticides through evaporation.

BENEFITS OF TRANSPORTER

- Maximum effectiveness of pesticides
- Minimal loss through evaporation
- Complete coverage due to optimal distribution
- Pesticides mix and dissolve better when TRANSPORTER is added to the liquid

USES

TRANSPORTER can be used with any substance that can be applied through fog or LVM techniques.

DOSAGE

10% of the total liquid (100ml TRANSPORTER + 900ml of water)

PREPARATION OF SPRAY LIQUID

- First mix the right amount of TRANSPORTER with the desired amount of water
- Add pesticides

STORAGE

The shelf life of TRANSPORTER is 2 years provided it is stored in a dark, cool and dry place.

DISCLAIMER

Our TRANSPORTER user advice, both oral and written, is based on the best knowledge at the moment. The most recent advice and tests are on our website. However, it is not possible for us, based on this notice, to accept liability for use, as we cannot control various factors during storage, transport, application and use of products delivered by us. Read and follow the instructions on the packaging before use.
